### PROFILE

Seeking a challenging role as a Full Stack Developer where I can leverage my skills in front-end and back-end development to contribute to innovative projects. Committed to delivering high-quality, scalable solutions while continuously expanding my knowledge and expertise in the field.

### PROFESSIONAL EXPERIENCE

#### Full Stack Development (MERN) - 6 Months

Intern, Why Global Services, Chennai, Oct 2023 - Apr 2024

##### Roles and Responsibilities:

- Developing responsive web applications using MERN stack technologies (MongoDB, Express.js, React.js, Node.js).
- Designing and implementing user interfaces with HTML and enhancing styling with Tailwind CSS.
- Building RESTful APIs with Express.js to facilitate communication between front-end and back-end.
- Managing MongoDB databases to efficiently store and retrieve application data.
- Collaborating with teams to deliver robust and scalable software solutions, while staying updated on industry best practices.

#### Python Developer - Team Leader (2.5 Yrs)

Dlk Technologies Private Limited, Chennai, Jan 2021- Sep 2023.

##### Roles and Responsibilities:

- Providing technical guidance and expertise in Python programming and best practices.
- Planning and prioritizing project tasks, ensuring timely delivery and meeting quality standards.

### SKILLS

Html 5

Css 4.15 & Tailwindcss v3.0

Javascript

Git

React js

Node 20.10.0

Express js

MySQL & MongoDB

Python 3.12

AI - Machine Learning

### EDUCATION

#### Anna University

BE - Electronics and Communication Engineering.

2016 – 2020 | Redhills, Chennai

Percentage - 7.5 %

### PROJECTS

#### E Commerce Website by using React

- Developed an online store using the MERN stack because of its dependable and responsive design.
- Implemented MongoDB as the database to store user information, order details, and product information.
- A RESTful API backend with Express.js to enable communication between the database and front end.
- JWT (JSON Web Tokens) was used to implement user authentication and authorization features, guaranteeing safe access to user-specific functionalities.

##### Technologies Used:

**Frontend:** React.js, Material-UI, HTML5, CSS3, JavaScript.

**Backend:** Node.js, Express.js, MongoDB

**Tool :** Visual Studio Code

### DECLARATION

I here by declare that all information said above is true to the best of my knowledge and belief.
